CJET

NOW 63 ON THE DIAL 1000 WATTS

RIDEAU BROADCASTING LIMITED • STUDIOS AND OFFICES • SMITHS FALLS, ONTARIO

December 1st, 1958.

Mr. Stanwood R. Morss,
RR #3,
BRADFORD,
Massachusetts.

Stan:

This is to verify your report on CJET's DX program on November. Sorry for the delay, but we had hoped that our QSL cards would arrive from the printer in time.

Weather doesn't help always, and conditions weren't the best that night generally. But we did get reports from: Pennsylvania, Connecticut, Ohio (Carey), New York, Rhode Island, Minnesota -- and Clarence Freeman of Clearlake California says he feels sure that CJET came in briefly out there too.

CJET's transmitter is a RCA type BTA, 1M. The signal is beamed north with three towers 275 feet placed in line. The power is 1,000 watts with high-level modulation. Enclosed is our local coverage map showing the .25 MV contour.

Our thanks and best wishes for writing Stan, perhaps we'll have the opportunity to write again.

Kind regards,

Ron McKee

Ron McKee,
Program Director.
